DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 6-7 and 28-33 in Paper No. 7 is acknowledged.
2. Further restriction to a ***single invention*** is required under 35 U.S.C. 121:
 - I. Claims 30-33, drawn to a semiconductor device "test head assembly" with "spring contacts," an "interposer," and "fixture," classified, for example, in class 324, subclass 754.
 - II. Claims 28-29, drawn to a "method", classified in class 438, subclass 17 with claims 6-7 being included in Group II as a "component" particularly usable and searchable with the "method" of claims 28-29, by the limitation of "spring contacts" that have "unsupported beams" between base and tip, classified, for example in Class 324, Subclass 765.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II (claims 28-29) and I (Claims 30-33) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case, the test head assembly of Group II (claims 30-33) could be used in a process of testing wherein the spring contacts do not have "a beam with an unsupported span" as is specifically required by the invention of Group II.

Art Unit: 2829

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group I device claims (i.e. claims 30-33) is not required for Group II device claims (i.e. claims 6-7), restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
